
Software Developer

Jeremy Wayne

hello@dsgn.co
www.dsgn.co

I am a highly skilled Software Developer known for engineering tailored web applications with an entrepreneurial and creative approach. My expertise spans data architecture, logic, flexibility, and proficiency in documentation, code reviewing, and testing.

I take pride in elevating software frameworks to exceed industry standards, delivering exceptional user experiences. Eager to apply my technical prowess and innovative thinking to new challenges, I am passionate about crafting solutions that align with business objectives and redefine user experiences.

Experience

2020 – Present

Front End Developer Grand Canyon Education – Remote

Senior Member of the highly dynamic remote Engineering Team, building and maintaining public, and proprietary company applications, portals, and websites that provides an array of support services in the post-secondary education sector. Heavily involved in creating the architecture for Interactive React Components within Next.js applications using custom, and 3rd party APIs that fully integrated with Drupal, WordPress, and custom Laravel frameworks via SCRUM/Agile management framework.

2010 - 2020

Director of Design & Development DSGN Co. – Denver

Founder and Owner of a multi-dimensional creative design & development company, specializing in visual aesthetic solutions that enhance human interactive experiences. DSGN Co. served as an apparatus to further the advancement of entrepreneurial partnerships in design, engineering, and technology around the globe.

2015 - 2016

Senior Web Developer Allis, Inc – San Francisco

Consultant and Partner of Web Development for San Francisco based design agency. Responsibilities included, information design, REST API and data design, custom SQL databases, along with building unique and highly interactive custom WordPress sites.

2013 - 2015

Senior Web Developer Alphabetical Order – Los Angeles

Consultant Developer for Los Angeles based design agency. Responsibilities included, website design, interactive design, website maintenance, problem solving, visual enhancements, digital branding, and custom WordPress integrations, themes, and plugins.

2011 - 2015

Senior Web Developer Popular Forces, Inc – New York/Los Angeles

Consultant and Partner of Web Development and Design for New York/Los Angeles based design agency. Responsibilities included, website design, interactive design, website maintenance, problem solving, visual enhancements, digital branding, and custom WordPress integrations, themes, and plugins.

2007 - 2014

Adjunct Professor of Design Arizona State University – Tempe

Non-tenured Instructor of Undergrad graphic design and Graduate Web Development courses at the School of Design at ASU. While adhering to the principles of Bauhaus design, I encouraged my student's self-discovery in visual problem solving and modern design principles.

2006 - 2011

Interactive Designer Fender Musical Instruments – Scottsdale AZ

Interactive design and development for global musical manufacturer. Oversee the design and development of interactive components for global marketing and logistics website builds for the world's largest manufacturer of musical instruments. Worked across multiple disciplines to ensure creative stayed consistent from concept to completion. Project ownership of building out the Fender.com website, worked directly with global brands such as Toyota, T-Mobile, and Warner Bros. Collaborated with artists such as Eddie Van Halen, Eric Clapton, and David Gilmour promotions.

Skills

Code/Programming

React	HTML5	Docker	WordPress
JavaScript + ES6	PHP v5-8	Composer	Drupal
Next.js	CSS/SCSS/SASS	Node.js	Twig
Vue	Bootstrap	Webpack	NPM
jQuery/Ajax	JSON	Gulp	Git
Apache	SQL Queries	Babel / Lint	
MySQL	Shell/CLI		

Creative

Adobe CS	Typography	Wireframing	Conceptualization
Photoshop	UX / UI Design	Prototyping	Design Guidelines
Illustrator	Web Design	Layout	
InDesign	Branding / Logo	Templating	

Professional / Admin

Azure DevOps	Sprint Planning	Self-Starter	Project Management
Dev Workflow	SCRUM / Agile	Collaborative	
Art Direction
